5.5" Wallmount PoE touchscreen controller
Date: January 12, 2026

IZI-Touch
5.5" Wall-mount PoE Touchscreen controller

IZI-Touch

5.5" Wall-mount PoE Touchscreen controller

The IZI-Touch is a sleek touchscreen device that connects to an IZI-AccessPro over the network. Using the IZI-Supervisor tool, you can design your own custom interface with buttons, faders, images and labels—tailored exactly to your installation. Functions can even be protected with a PIN code for secure operation.

One of its greatest strengths appears when multiple IZI-Touch units are linked to the same IZI-AccessPro: every button and fader stays perfectly synchronized across all devices. The screen layout and configuration are automatically downloaded from the IZI-AccessPro, keeping everything consistent and easy to manage.

Whether in theaters, hotels, cinemas, or large multi-zone venues, the IZI-Touch offers effortless, elegant lighting control wherever you need it. The IZI-Touch is a freely programmable touchscreen control panel for wall mounting, suitable for use in combination with the IZI-AccessPro light controller/gateway.

Technical specifications

Power:	Power supply:	PoE - IEEE802.3af Class4
	Power consumption:	10 Watt maximum
Touch display:	Type:	5.5" wide angle IPS panel
	Resolution:	1280 x 720 pixels
	Touch:	10-point capacitive touch
	Brightness:	300nits
	Display rotation:	0°, 90°, 180° and 270°
Connections:	Power input:	PoE, RJ45
	Ethernet:	100/1000 Mbps
	USB:	USB-C connection
Miscellaneous:	Housing:	Aluminum and glass
	Weight:	250 grams
	IP-Rating:	IP20
Dimensions:	L x W x D:	146 x 84 x 33
Certifications:	CE / RoHS	
	Warranty	2 years
Order code:	TDEL-4010820	IZI-Touch, 5.5" Wall-mount PoE touchscreen controller

IZI-Touch features:

- 5.5" Wall-mounted IZI-Touch Control Panel
- High resolution wide angle IPS Touch display
- PoE connection
- Automatic synchronization between multiple IZI-Touch displays
- Full control over most features of the IZI-AccessPro

Freely programmable display layout:

- In total maximum 32 objects with buttons, border buttons, faders, master faders and labels
- Programmable button actions with Toggle, Pulse, Trigger & Radio-buttons
- Programmable colours for buttons, labels, fonts, groups & background
- Up to 4 user defined images
- Timeout & sleepmode settings with optional PIN-code levels and screensaver image
